## Tacolyn™ 5085 Resin Dispersion

Revision: 11.04.2022 Page 1 of 2

Tacolyn™ 5085 resin dispersion is an aqueous, 55% solids, solvent-free anionic hydrocarbon dispersion prepared from a low molecular weight, aliphatic C5 hydrocarbon resin. It is recommended as a tackifier for isoprene rubber and natural rubber latex polymers used in tape applications. Tacolyn™ 5085 is a good reinforcing agent that maintains excellent peel control when used in pressure sensitive tapes.

- Good reinforcing agent that maintains excellent peel control
- · Resistance to acids and alkalies

Property	Typical Value	Unit	Method <sup>1</sup>
Particle Size	250	nm	Average particle size
Coarse Particles	0.1000	% max	Wt% of particles >45 microns
Ring and Ball Softening Point	82	°C	ASTM E 28, dispersed phase (base resin+emulsifier)
Shelf Life	274	days	
Total solids content	55	%	
рН	10.0		
pH Tolerance Range	4-13		
Viscosity at 25°C	1300	сР	Brookfield
Density	0.98	g/mL	

<sup>&</sup>lt;sup>1</sup> internal method based upon the specified norm

#### **Applications**

Carpet, Tapes, Caulks and Sealants, Speciality tapes, Flooring Adhesives, PSA Packaging tapes

## Compatibility and Solubility

Compatible with natural rubber latex. When mixed with cationic substances, this dispersion may precipitate. When high alkaline or acidic additives are added to Tacolyn<sup>™</sup> 5085, gross localized pH-variations should be avoided, as these can lead to destabilization and grit formation.

## **Packaging**

Available in lined fiber drums (445 lbs/202 kg net wt.), disposable totes or tank trucks. Keep container closed to prevent formation of dried film on container walls. If dry filming occurs, filter product before use.

### **Storage**

The recommended storage temperature range is 50°-100°F. This resin dispersion may be irreparably damaged if frozen. Accordingly, all shipments in cold climate areas are made in insulated or heated carriers. It is recommended that strict control of inventory be observed at all times, taking care that the oldest material is used first.

The useful life of this product can be affected by storage and handling conditions. This dispersion will remain within product specification limits for at least 274 days from date of manufacture from an Synthomer production facility provided that storage conditions are observed.
