

Copolymer of butadiene-acrylonitrile partitioned with calcium carbonate

Property	Typical Value	Unit	Method <sup>1</sup>
Physical Form	off-white powder		
Average Particle Size	0.3	mm	
Density	1.05	g/ml	
Physical Structure	Pre-crosslinked		
Mooney Viscosity (1+4 @100°C)	50		
ACN content	35	%	

<sup>1</sup> internal method based upon the specified norm

## Application Advice

Chemigum P35 is a NBR powder grade used for PVC modification that requires good compression set. It is recommended for extrusion processed applications.

### Key Features

- Allows to tailor-make low compression set plasticized PVC formulations
- Improves plasticizer retention on exposure to oil, fuels & heat
- Excellent chemical and oil resistance

### Typical Applications

- Window gaskets
- Seals
- Hose & Tubing

## Shipping and Storage

Available packaging: 25kg bags (poly) & 400kg big bags

The product must be stored in dry, well ventilated area. It is recommended to store in original packaging, away from direct source of heat and sunlight. Information on environmental and hazard data may be taken from the material safety data sheet.

## Product Safety

Before handling, please read the Safety Data Sheet of this product for advice on safety, use and disposal.
