Property	Typical Value	Unit	Method ¹
Brookfield Viscosity	< 150	cps	(RVT #2, 60 rpm, 25°C)
Density	8.6	lb/gal	
Ionic character	anionic		
Mechanical Stability	Excellent		
Multivalent Ion Stability	Excellent		
pH	6.5		
specific gravity	1.03		
Tg	54	°C	
Total solids	51	%	

¹ internal method based upon the specified norm

Application Advice

GenFlo 8045 latex is a stiff and moldable hand builder for carpet backing and nonwovens with high tensile strength and water resistance.

Shipping and Storage

GenFlo 8045 is normally delivered in bulk (Tank Truck). Shipment in 1 ton containers is also possible. The storage temperature of the dispersion should be at 22°C (70 F). In air-tight, unopened, original drums or containers, and provided the storage conditions are met, the dispersion is stable for 6 months. Do not expose the product or container to direct sunlight or to freezing temperatures. Mix the contents thoroughly before sampling. Product may undergo accelerated thickening with increased heat. Avoid prolonged storage at high temperatures.

Product Safety

Before handling, please read the Safety Data Sheet of this product for advice on safety, use and disposal.
