

REVACRYL UltraFine 1901 is a fine particle sized aqueous dispersion of a styrene acrylic copolymer.

It is suitable for both interior and exterior applications where its ability to penetrate makes it an excellent vehicle for the deep priming of substrates. It offers low odour and is suitable for biocide-free primer.

Property	Typical Value	Unit	Method ¹
Solid content	31	%	ISO 3251
pH	7.5		ISO 976
Viscosity (Brookfield 2/50)	< 100	mPa.s	ISO 2555
MFFT	0	°C	ISO 2115
Tg	10	°C	internal method
Particle size	40	nm	internal method

¹ internal method based upon the specified norm

Key Advantages

- Very small particle size (40 nm)
- Low odour
- Highly recommended as primer for mineral substrates
- Suitable for biocide-free formulations
- Good alkali and saponification resistance
- Outstanding penetration into substrates
- Consolidation of chalky substrates
- Homogenizing substrate absorbency
- APEO-free

Shipping and Storage

This product is supplied in road tankers or in non-returnable plastic drums secured by a lid with clamping ring or in non-returnable palletized bulk containers (net volume 1.000 lt). The product must be protected from frost and exposure to direct sunlight. Storage temperatures between +5 °C and +30 °C are recommended. The product contains in-can preservation to protect it against microbiological attack during transportation. For protection against microbiological contamination during storage stringent plant hygiene is essential. Depending on the storage conditions addition of suitable preservatives may be necessary. Care must be taken that drums and containers are properly closed. During storage, shipping and handling contact with metal surfaces that are not corrosion protected must be avoided. When stored properly, the product has a shelf life of 6 months from the date of delivery.

Product Safety

Before handling, please read the Safety Data Sheet of this product for advice on safety, use and disposal.
