Subject: EUDR Compliance Statement

Synthomer plc (“Synthomer”) hereby confirms that **none** of the products it places on the EU market fall within the scope of the EU Deforestation Regulation (Regulation (EU) 2023/1115) (“EUDR”).

The European Regulation on Deforestation-free Products (EUDR) has been introduced by the EU to ensure that relevant commodities and products traded into, within and from the EU market are not linked to deforestation or forest degradation. This regulation aims to reduce the EU’s contribution to global deforestation and promote sustainable sourcing practices.

Synthomer understands the critical importance of protecting forests and biodiversity, and we are committed to sourcing our materials responsibly (in compliance with EUDR).

The EUDR introduces due diligence and reporting requirements to relevant commodities and their derivatives (wood, soy, palm oil, cocoa, coffee, rubber, and cattle). The comprehensive list of relevant commodities and products are referred to in EUDR Annex 1.

Having assessed its product portfolio against the requirements of EUDR we confirm that:

- No Synthomer product(s) containing relevant commodities are listed in Annex 1 of EUDR
- No EUDR declaration is required for the product(s)

Synthomer will continue monitoring relevant regulatory developments to ensure ongoing compliance.

Should you require any further information, please do not hesitate to contact us.
