EU REACH - Candidate List of Substances of Very High Concern for Authorisation (SVHCs)

Under EU REACH, companies may have legal obligations with respect to the inclusion of substances on the Candidate List¹.

Synthomer can confirm that over 98% of their products do not contain Substances of Very High Concern at levels above 0.1% w/w.

To the best of our knowledge these substances,

- Are not intentionally added as raw materials (based on information from our suppliers).
- React onto the polymer backbone and the residual monomer is below 0.1% w/w.
- Are not generated as part of any manufacturing process.

Where exceptions exist, then Synthomer is committed to meeting its legal obligations and the identity of the substance will be listed on the safety data sheet as required by Annex II of EU REACH. Please refer to the Safety Data Sheet for information regarding the safe use of these products.

Synthomer is currently reviewing the use of these substances with the intention of finding replacements where necessary.

For further information please consult your Synthomer representative.
