

## PLEXTOL R 4184

PLEXTOL R 4184 is an acrylic polymer dispersion based on APEO free surfactants and designed for use in premium highly durable exterior paint. It does not contain any added formaldehyde.

PLEXTOL R 4184 is developed to have early water blister resistance.

Property	Value	Unit	Method <sup>1</sup>
Total Solid Content	45 ± 1	%	
pH	8.0 ? 9.5		
Viscosity@ 25 °C - Brookfield #3/60	100 ? 1,000	cps	
Particle Size	0.13	µm	
Minimum Film Forming Temperature	33	°C	
SG of Dispersion @ 25 °C	1.05		

<sup>1</sup> internal method based upon the specified norm

### Application Advice & Processing

Suitable for exterior paint which need early shower resistance, interior silk paints, wall sealers & primers

### Shipping and Storage

To ensure maximum stability and maintain optimum polymer dispersion properties, PLEXTOL R 4184 should be stored in closed containers at temperature between 5C and 32C, away from heat sources and direct sunlight. All storage should conform to local fire and building codes.

When properly stored, PLEXTOL R 4184 will remain stable for 6 months from date of delivery.

### Product Safety

Before handling, please read the Safety Data Sheet of this product for advice on safety, use and disposal.
