REACH Statement (December 2010)

Synthomer continues in its commitment to achieving compliance with the European REACH Regulation (EC No. 1907/2006).

Registration of relevant substances for Synthomer products in 2010 has been completed. Synthomer customers will be informed of substance registrations in supply chain communications, wherever required by the REACH legislation.

Where a 2010 registration deadline was required, Synthomer has taken steps to ensure that the required registration has been carried out by their upstream suppliers. In certain cases, Synthomer has registered substances itself.

Synthomer therefore expects its customers to be able to continue to use Synthomer products according to intended use.

The majority of Synthomer products are non-hazardous polymer mixtures. For non-hazardous products, there will not be the need to adjust Safety Data Sheets with registration numbers or Exposure Scenarios. In the case of hazardous products, the safety data sheets will be updated with Exposure Scenarios as and when new information regarding hazards and risk management measures is received from Synthomer's suppliers.

To reduce the administrative burden on suppliers and customers, Synthomer has also prepared the following statements regarding REACH compliance,

- REACH brochure
- Registration Deadlines of Synthomer Products
- Potential Candidate List Substances (SVHCs)
- Safety Data Sheets and GHS
- Synthomer Uses Document
- The REACH Candidate List Substances (SVHCs)

These can be found at www.synthomer.com. Please read these documents prior to submitting any further enquiries.

Please direct any additional questions to reach@synthomer.com. Failure to use the correct contact address could result in a significant delay in answering any enquiries.

This statement does not constitute a commitment, guarantee or representation by Synthomer that it will support products or substances under REACH or uses of them
